WHY WORK WITH US

1 Experienced team

Capable of handling projects of virtually any size.

2 Great rates

Thanks to a development office in Eastern Europe.

3 Effective project management

Offices in Canada & Belarus, highly trained managers.

4 Full development cycle

We will work on your product through all stages of its creation.

| | WITH US | WITHOUT US |
|-----------------|---|---|
| Budget |      |      |
| Customer Time |      |      |
| Product Quality |      |      |
| Delivery Terms |      |      |
| Result |  |  |

HOW WE DO IT

1. ANALYZING YOUR IDEA

At this stage, we analyze your requirements, its implementation complicity, and livability.

2. DEFINING SOFTWARE REQUIREMENTS

We start from creating complete specification document that describes every piece of software in order not to miss a thing.

3. STARTING AGILE DEVELOPMENT CYCLE

We allocate required resources and assets. Only after the environment is set up we start coding. Every iteration we publish ready-to-test functionality in order to reach 100% performance.

4. ASSURING SOFTWARE QUALITY AT EACH STEP

Quality assurance is applied at every step of software development. Every iteration is being reviewed by professional QA specialists.

5. DELIVERING PRODUCT

When the product passes all tests and ready to be used we transfer it to the production environment. We also provide educational materials for your personal in, if required, educate your staff on how to use the software.

6. CONTINEOUS PRODUCT SUPPORT

We provide continuous product support on the preliminarily defined terms.

BAG RETURNER

was created to speed up processing lost luggage and includes separate versions for passengers and airport workers.

4 specialists:

1 Android Developer

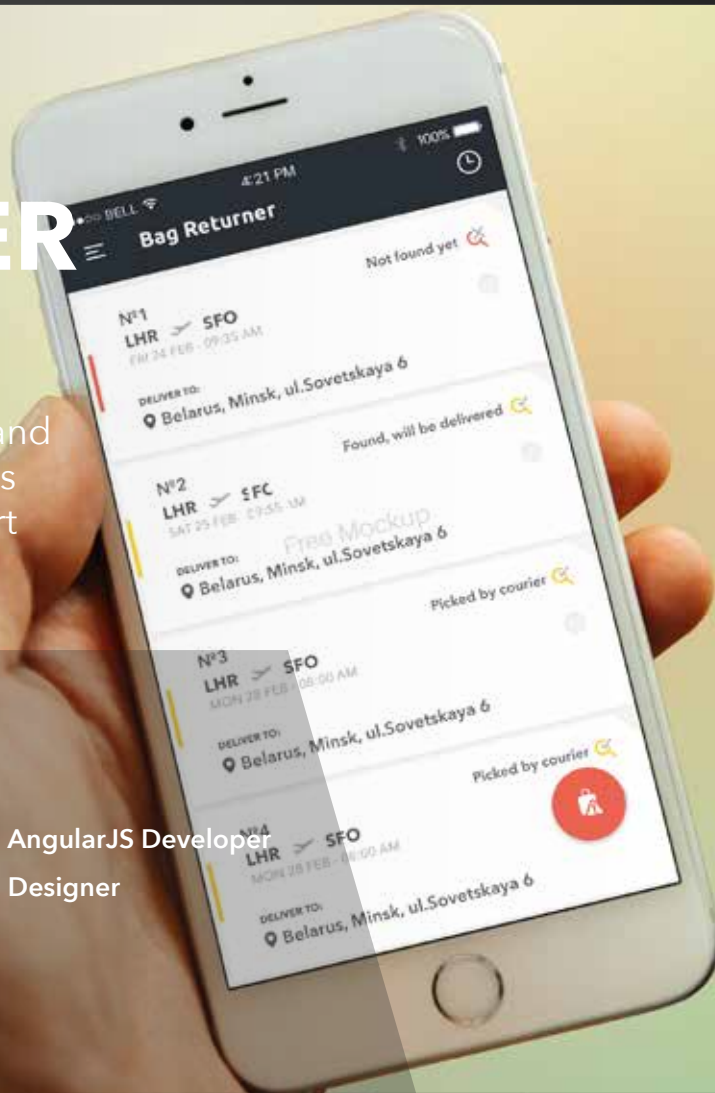

1 NodeJS Developer

1 AngularJS Developer

1 Designer

6 months

The passenger version allows to fill out the necessary paperwork in 4-5 minutes instead of a half-hour or more. Cautious users can even prepare the documents in advance and attach a picture of their luggage to help find it. Among other features, the app includes a system for tracking the bags and a chat for communications with the local "Lost and found" service.

The version for airport workers allows tracking the luggage by QR codes or RFID tags, as well as communications with customers and baggage handlers in other airports. It can quickly match the lost piece of luggage with owner's address and ensure that the property would be returned.

TRIPME

4 specialists:

- 1 .NET Developer
- 1 iOS Developer
- 1 Android Developer
- 1 Designer

4 months

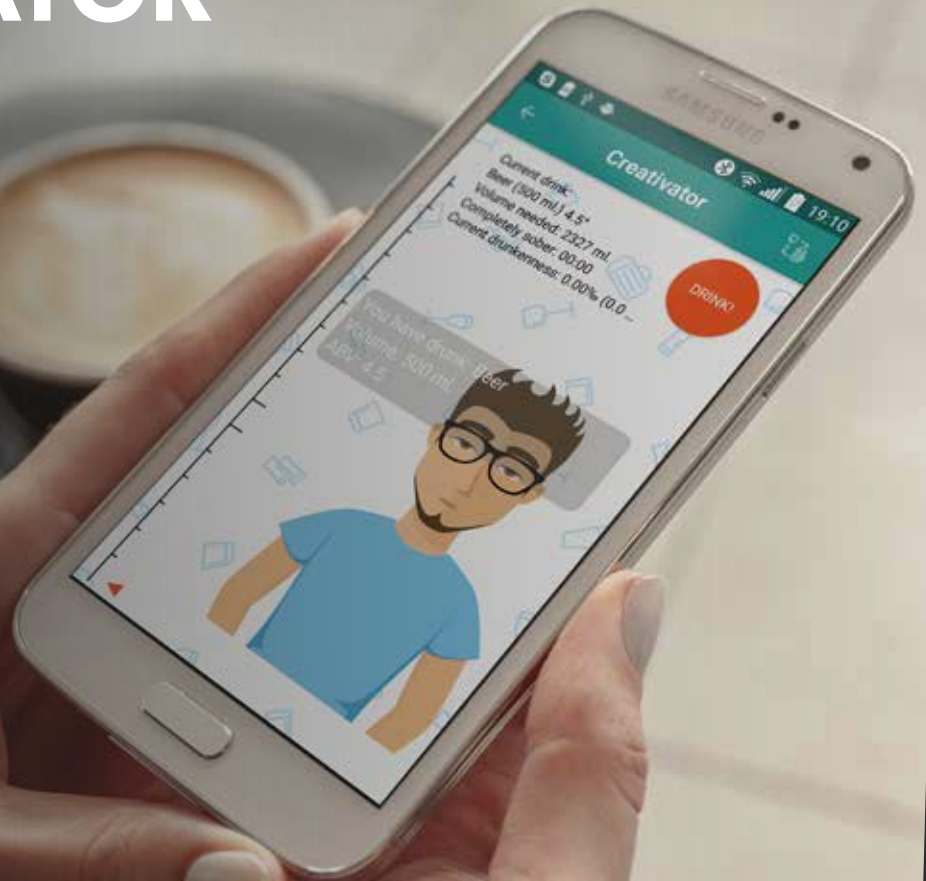

TripMe helps tourists make the most out of their visit to the foreign country. It contains interesting information about the local attractions, useful phrases in the local language and legal advice to avoid potentially distressful situations abroad. It is integrated with the most popular social networks, so the users can share their memorable moments faster. The app can work in offline mode to save the users money on roaming fees.

TripMe also has a **web-based version for travel agencies**, which allows them to keep in touch with their customers via inbuilt messenger, control the activities of local guides and managers and quickly respond to client complaints.

CREATIVATOR

2 specialists:

1 Android Developer

1 Designer

2 weeks

An app that bridges the gap between work and play, Creativator is a tool that helps developers control their blood alcohol levels for optimal coding performance. Thanks to advanced formulae, the app is able to calculate "**Ballmer's peak**" for its user and notify him about measures needed to continue working at best capacity.

DELEGO

4 specialists:

- 1 .NET Developer
- 1 iOS Developer
- 1 Android Developer
- 1 Designer

4 months

TechSpire specialists participated in developing an advanced system which is able to integrate almost any smart device and control it from the customer's mobile phone.

It works with most kinds of connected appliances, from the TV and air conditioning to webcams and window shades.

STAY IN TOUCH

3 specialists:

1 Android Developer

1 iOS Developer

1 Designer

4 weeks

“StayInTouch” helps users to learn news from their favorite cafes, shops, and museums.

“StayInTouch” is a place to learn about discounts at your favorite shop, a new exhibition at the local art gallery and updated menu in that nice restaurant on the corner. Moreover, it can be a virtual guide or help you place your order before the waiters even see you.

CONDUIT

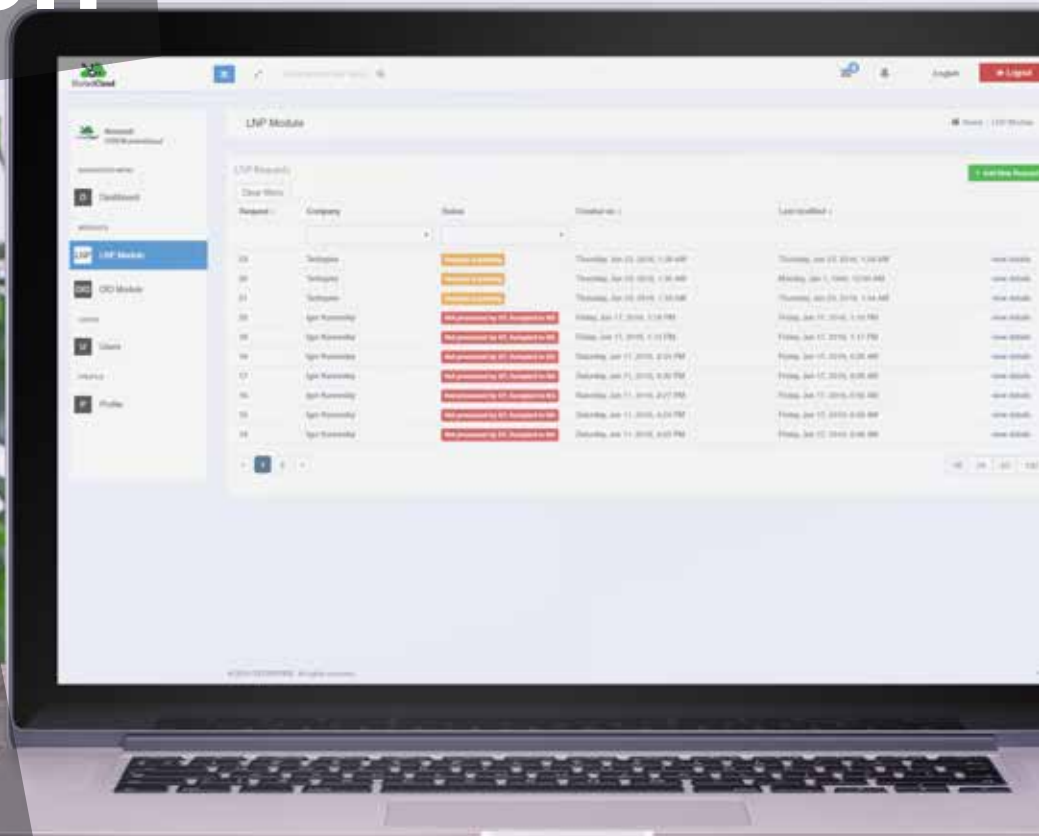

2 specialists:

1 NodeJS Developer

1 AngularJS Developer

4 months

“Conduit ” id a web application that allows resellers to manage certain functions without involving the labor of VOIP-provider company.

The software is built using modules, which are responsible for: ordering new DID, porting existing DID, allowing resellers to do billing of their end-customers and allow a service provider to bill resellers, calculating commission, providing reporting and statistics.

FRISKY DEALS

2 specialists:

1 .NET Developer

1 Front-end Developer

12 months

Frisky Deals' mission is to become a valued resource for individuals and within communities as a source of incredible savings. By connecting consumers and merchants, we have the opportunity to become one of the world's leading resources for essentials and a daily habit for our clientele and partners.

KUPOL.ME

4 specialists:

2 Frontend Developers

1 Backend Deletoper

540 hours

Kupol is a service that helps return important property and documents to their owner. TechSpire specialists developed the whole web platform, including billing, user's personal cabinet, call center integration and travel agency registration. All the features are well-connected to speed up the service as a whole.
