

# Bookkeeping solution tailored for your business needs

Bookkeeping and accounting services that every growing organization can rely on.

## A bookkeeping partner you can count on

At Enkel, we understand that business owners need reliable accounting and bookkeeping services to grow their business. That's why we help organizations across Canada simplify their accounting and back office functions using cloud-based accounting software and systems that reduce time and effort.

Regardless of where you are located in Canada, you can rely on our team of experienced bookkeepers and professional accountants to take care of your back office accounting needs. All-in or selected services only, the choice is yours.

### Bookkeeping

Using the best in cloud-based accounting technology, we help you process your invoices and receipts, provide bank account and credit card reconciliations, and deliver monthly financial reporting.

### Payroll

Our team of Certified Payroll Professionals will ensure accurate and timely payroll processing with paystubs through direct deposit, and help you with ROE preparation, T4 management and delivery, statutory remittances, and tax reporting.

### Accounts Payable

We code and input vendor invoices and receipts, facilitate vendor payments with preferred payment method(s), update AP listings with accurate data, and generate timely cash flow visibility.

### Accounts Receivable

We input invoices and receipts into your online accounting system, send invoices and reminders to customers, follow-up on outstanding invoices, and keep AR listings accurate and reliable.

### Fractional Controllership

From budgeting and forecasting to getting support with fundraising and investor reporting, our team can bring on the financial expertise your company needs and turn your financial data into an action plan.

# Building a better back office with people, process & technology

Breakthroughs in accounting technology have enabled smarter, faster, and more efficient accounting practices. At Enkel, we've married client-centric, technology-powered accounting processes with experienced professionals that deliver timely, reliable accounting and bookkeeping services at an affordable price.

## Simple Tech Setup & Training

We utilize cloud-based accounting technology to streamline your accounting processes. You don't have to worry about technology setup, integrations, training, or upgrades.

## One Stop Shop Accounting Team

From bookkeepers to payroll administrators to fractional controllers, we provide you with the right accounting expertise at the right time, for your growing business.

## World Class Data Security & Privacy

The security of your financial data is our top priority. From staff security training to daily data backups and encryption, you can trust us to handle your data with care.

Enkel really took the time to understand our business and crafted a process that worked best for our company. Everything is delivered as expected month after month, and I no longer have to worry about our year-end because Enkel liaises directly with my SR&ED consultant and year-end tax accountant.

– **Lars Kristensen**, Founder & CEO, Nice Job
